

Samsung 500C ChromeBook Individual Key Cap Replacement

A guide to replacing individual key caps on the keyboard.

Written By: Garrett Kissinger

INTRODUCTION

This guide is for replacing a key cap on a Samsun 500C Chromebook. This is for whether a key cap fell off or if you are having problems with sticky keys etc.

TOOLS:

- [Spudger](#) (1)
-

Step 1 — Individual Key Cap

- You can skip this step if the key cap has already fallen off, and you are just trying to put it back on.
- Remove the original key cap by prying it off with a spudger.

Step 2

- Once the cap is off you press the key back onto the keyboard till it clicks.
- Some keys are special and contain metal bars. These keys include the ctrl, alt, space, shift, tab, enter, search, and delete. To put these keys back on the metal bars must be slid under the metal locks, and pressed on.

To reassemble your device, follow these instructions in reverse order.
